Pelle Development Group makes it easy to be green. Tom and Angela Pelletier, husband and wife team, are the driving force behind Pelle and Inman Green. Even though the Pelletier's have been in business for years, it wasn't until after they married and had a family of their own that they realized just how important it is to live green. They do their dirty work, so that all you have to do is move in, live green.

green

By Brett Lane

Inman Green is a small, sustainable community at the edge of Dekalb Avenue that allows owners to easily live a green lifestyle. Gold LEED Certified saves the homeowner an average of 47% in energy savings, yearly.

LEED Certification promotes environmentally responsible as well as sustainable housing by allotting points—the maximum number available

is 136 for Platinum. Inman Green's Gold LEED is the next best thing. Points are allocated by performance in eight areas: design, location, sustainable sites, water efficiency, energy & atmosphere, materials & resources, indoor environmental quality as well as awareness & education.

Inman Green boasts green measures that include recycled glass countertops, recycled insulation, roof

living

top decks set up to grow vegetation, polished concrete floors throughout, energy efficient lighting, tankless hot water heaters, and dual flush toilets. These modifications result in lower operating costs and an increased asset value.

For More information on what's currently available, and to see the Lenders they have chosen to work with, visit www.inmangreen.com.
